

Sayali Patil

Kolhapur, Maharashtra | sayalipatil9637@gmail.com | 9834528697 | github.com/Sayali-2004

Professional Summary

Motivated Artificial Intelligence and Machine Learning (AI/ML) student with a strong foundation in Machine Learning, Natural Language Processing (NLP), and Generative AI. Proficient in Python, Java, and SQL, with experience developing AI-powered applications using Flask and REST APIs. Possess solid knowledge of Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, Computer Networks, and DBMS. Skilled in using Jupyter Notebook, Google Colab, GitHub, and VS Code for model development and software projects. Passionate about applying AI and software engineering skills to solve real-world problems while continuously learning and contributing to innovative, impactful solutions.

Technical Skills

- **Programming:** Python, Java, SQL
- **AI/ML:-** Machine Learning, NLP, Generative AI.
- **Frameworks & Tools:** Flask, REST APIs.
- **Concepts:** Data Structures & Algorithms, OOP's, Operating system concept, Computer Network, DBMS
- **Tools & Platforms:** Jupyter Notebook, Google Colab, GitHub, VS Code.

Education

B.Tech in Computer Science and Engineering (AI & ML)

D.Y. Patil College of Engineering and Technology, Kolhapur

- CGPA: 8.5

Higher secondary Education (12th)

Devchand College, Arjun Nagar

- Percentage: 66%

Secondary Education (10th)

Shree Mahalaxmi Junior College, Lingunur

- Percentage: 85%

Internships

IIT Bombay | EdTech Intern

- Performed multimodal data analysis (EEG, GSR, eye-tracking) to study cognitive load under time pressure.
- Built Python data pipelines (Pandas, NumPy) and ML models for stress classification and performance prediction.

AI-ML Virtual Internship | AWS Cloud

- Trained and deployed ML models using AWS SageMaker and Lambda.
- Worked on real-time predictions and scalable cloud-based AI workflows.

Publications

Unveiling the Bhagavad Gita: AI-Powered Sanskrit Translation and Insights

Published in IEEE NOIDA; presented at 2025 ICCSAI, Galgotias University.

- Focused on AI-based translation models for Sanskrit and the Bhagavad Gita's interpretation.
- Developed interactive applications using NLP and ML for linguistic insights.

Projects

AI-Powered Job Screening System (TalentMate)

- Built an AI system to automate candidate shortlisting using NLP-based screening.
- Focused on secure handling of candidate data and efficient filtering.

LSB Image Steganography (Python)

- Developed a Python tool using LSB technique to hide and extract secret text inside images.
- Implemented using OpenCV and NumPy, applying privacy and information security concepts.

Sanskrit-to-English Translation Web Application

- Developed a Flask-based AI web application to translate Sanskrit into English.
- Used NLP and ML models to improve translation quality and usability.

Analyzing Employee Trends (SQL + Analytics)

- Performed analysis on HR employee datasets to uncover trends in attrition and satisfaction.
- Used SQL queries to answer key business questions and derive insights for decision making.

Certificates

- Machine Learning with Python — IBM
- Java: Data Structures and Algorithms — Codio
- Python Essentials 2 — Cisco Networking Academy

Leadership & Activities

- Microsoft Learn Student Ambassador
- Academic Coordinator and Event Manager, PrathamCode – National Level Coding Event
- Coding Club Coordinator – D.Y. Patil College of Engineering and Technology
