

Shreya Dadaso Patil

Kolhapur, Maharashtra

+91 9322429448 — patilshreya7211@gmail.com

Professional Summary

I am a Third-year B.Tech student with a strong interest in software development and problem solving. I have a solid foundation in Data Structures and Algorithms and am proficient in Python, Java, HTML, CSS, and modern web technologies. I am highly motivated to learn new technologies and collaborate effectively in team-based projects.

Technical Skills

Programming Languages: C, Java, Python

Frontend: HTML, CSS, JavaScript

Core Concepts: Data Structures and Algorithms (DSA)

Tools: VS Code, Git, GitHub

Education

Bachelor of Technology in Computer Science and Engineering (AIML) Ongoing

Rajarambapu Institute of Technology, Rajaramnagar(Sakharale)

GPA: 9.24

HSC (12th) 2024

Devchand College, Arjunnagar

Percentage: 69.67%

SSC (10th) 2022

Mohanlal Doshi Vidyalay, Arjunnagar

Percentage: 90.60%

Internships

Infosys Springboard Virtual Internship 7.0 — Artificial Intelligence June 2026 – Present

- Currently participating in the Infosys Springboard Virtual Internship 7.0 focused on Artificial Intelligence.
- Gaining practical exposure to AI concepts, machine learning fundamentals, and real-world applications.
- Working on guided assignments and projects to strengthen analytical and problem-solving skills.

Thiranex — Full Stack Development Intern June 2026 – Present

- Currently undergoing training in Full Stack Development through Thiranex.
- Learning frontend and backend technologies including HTML, CSS, JavaScript, and database integration.
- Developing web applications and improving software development skills.

Projects

Blood Donors Management System Website

- Technologies: HTML, CSS, JavaScript, PHP, MySQL
- Developed a blood donation management web application with donor registration and inventory tracking.

- Implemented machine learning-based blood shortage prediction to improve availability and planning.

Medical Store Management System

- Technologies: HTML, CSS, JavaScript, Python
- Developed a web-based system to manage medicine inventory, billing, and customer records.
- Implemented stock tracking, medicine management, and user authentication features.

Fire Detection System for Cattle Safety

- Technologies: Arduino, Flame Sensor, Servo Motor
- Developed a system to detect fire and trigger a buzzer alert in real time.
- Automated safety actions using servo motors to protect cattle and reduce fire hazards.

Co-Curricular Activities

-
- Member of GDG (Google Developer Groups) Club, actively contributing in the Web Development domain.
 - Participated in Girls Wanna Code 7.0, improving coding and problem-solving skills.
 - Participated in Google Summer of Code (GSoC) 2026, gaining exposure to open-source development.

Certifications

NPTEL — Database Management System (DBMS)	Jan 2026 – Mar 2026
• Completed an 8-week NPTEL course on Database Management Systems. • Achieved a consolidated score of 69%.	
Accenture – NASSCOM — Acquiring Data (Level 1 – AI Fundamentals)	2026
• Successfully completed the Level 1 certification in AI Fundamentals.
